

## SUMMARY

I am a self-taught Software Developer with a history of collaborative problem solving and a strong desire to use my skills and experiences to better the spaces I'm a part of. Enthusiastic about learning and coding, with a desire to apply skills on diverse teams, I'm eager to tackle more complex problems.

## SKILLS

HTML CSS JavaScript Python Ruby Ruby on Rails SQL

## EXPERIENCE

APRIL 2021

**TEA LOVER'S APP** / All Aboard Bootcamp

**Ruby on Rails, JavaScript, HTML, CSS**

[Source Code](#) | [Video Demo](#)

- Full-stack application that created as a capstone project for All Aboard Bootcamp
- Users can sign up for an account, find and share information on tea shops, tea-based recipes as well as catalogue their personal tea collection

MARCH 2021

**VOLUNTEER TEAM MEMBER** / Equalithon.io

- Participated in a two week long hackathon during International Women's Month in response to a challenge proposed by tech non-profit, Girl Develop It, to help their trainees decide what technology they should learn, based on their past experiences and what's needed in the market
- Participated in virtual planning meetings with developers and project managers to propose a solution to the challenge
- Contributed HTML code to help prepare a mock-up of a career quiz

MARCH 2020 – PRESENT

**CERTIFICATION PANELIST** / Women's Flat Track Derby Association, Remote

- Review applications for officiating certification and write summaries based on all the material provided, clearly identifying strengths and challenges, while determining a level of certification
- Stay up to date on changes made to the certification process by reviewing documentation
- Participated in discussions of the certification process to help come up with solutions to issues with the certification process that arose from volunteer and user feedback

## EDUCATION
